www.github.com/StefanTrajkovski

Motivated and versatile Software Engineer with experience in web development, specializing in modern JavaScript frameworks like **React** and **Next.js**. Proven ability to deliver end-to-end solutions, from building responsive and user-friendly front-end interfaces with **HTML5**, **CSS/Tailwind**, and **TypeScript** to developing robust back-end systems with **PHP/Laravel**. Adept at collaborating in agile teams to implement features, optimize performance, and meet client requirements. Eager to apply a strong foundation in problem-solving and a passion for clean, efficient code to a challenging software engineering role.

Work experience

Gemak Trade | Freelance Web Developer | 05.2025 – Present

- Developed and delivered 3 web applications utilizing HTML5, CSS, Tailwind CSS, React, TypeScript, and Next.js
- Engineered responsive UI components to enhance cross-device compatibility and user experience.
- Implemented modern design practices and performance optimization techniques to improve application speed and efficiency

Johnson Matthy | Microsoft Power Platform Developer | 11.2024 – 02.2025

- Engineered responsive UI components to enhance cross-device compatibility and user experience.
- Designed and delivered custom applications, automated workflows, and interactive dashboards to address simulated business use cases.
- Strengthened expertise in problem-solving and collaborative teamwork within a deadline-driven environment.

EasySteps | FullStack Developer Internship | 06.2024 – 10.2024

- Contributed to full-stack web development projects using Vue.js for front-end and Laravel for back-end.
- Collaborated within an Agile team environment to implement new features, optimize performance, and enhance user experience (UX).
- Built responsive interfaces and scalable back-end solutions to support application functionality.

Education

Brainster Next College | Software Engineering | 2023 - 2026

- Studied full-stack web development at Brainster Next College.
- Gained hands-on experience with JavaScript, PHP, and the Laravel framework.
- Strengthened coding and problem-solving skills through theory and real-world projects

Skills

HTML & CSS | JavaScript | Laravel Framework | PHP | Git | Tailwind | My SQL | Microsoft Office | React.js | Next.js | TypeScript | API Testing & Integration | Python | Django | ML |

Languages

Multilingual | Macedonian • Native | Serbian • C2 | English • C2

Soft skills

Effective communication | Active listening | Multitasking | Critical thinking | Problem Solving | Adaptability | Conflict resolution | Teamwork | Time management

Projects

Developing a Platform for Embassy of Netherlands | 03.2025

Invited to participate in a specialized hackathon supported by the Embassy of the Netherlands, focusing on developing solutions for technical education and academies. Collaborated within a multidisciplinary team to ideate, prototype, and present a project aimed at enhancing technical skills development and educational accessibility, aligning with the embassy's mission to foster innovation and growth.

Developing a Platform for Sparkasse | 10.2024

Selected to participate in a competitive live hackathon hosted by Brainster and Sparkasse Bank, focused on developing innovative solutions for the modern banking and finance sector. Collaborated within a team to conceptualize and build a project prototype addressing real-world challenges presented by one of Macedonia's leading financial institutions.

Developing a Platform for Sava Osiguruvanje | 07.2024

Actively participated in a live hackathon to design and develop a innovative platform concept for Sava Osiguruvanje, a leading insurance company. Collaborated within a team under tight deadlines to tackle real-world business problems, applying agile methodologies from ideation to a functional prototype and final presentation.
